OFFICE OF SECRETARY

TO: REED HUNDT, CHAIRMAN  
THE FEDERAL COMMUNICATIONS COMMISSION

Re: Compatibility Between Cable Systems and Consumer Electronics Equipment  
ET Dkt. No. 93-7 (Implementation of Section 17 of the 1992 Cable Act)

As owners and users of TVs and VCRs, we join the **Consumer Federation of America** and the **Home Recording Rights Coalition** in supporting measures to eliminate the cable monopoly over set-top boxes and to foster an open market for cable-related consumer devices. We applaud the Commission for its efforts to date in promoting compatibility between cable services and consumer-owned equipment. We respectfully urge the Commission to continue its pro-consumer efforts and enact the following measures in its next round of rulemaking:

- ◆ **Prohibit scrambling on all regulated tiers of cable service that were not scrambled before the enactment of the 1992 Cable Act**, so cable companies cannot impose new set-top devices or other equipment on subscribers whose service is unchanged.
- ◆ **Separate signal access control functions from other functions provided by set-top boxes**, so that except for descrambling modules, we can purchase fully capable set-top boxes, TVs and VCRs at retail.
- ◆ **Establish standards for digital cable transmission**, including a national renewable security standard, so in the future we can buy compatible TVs, VCRs and other equipment without having to rent any access devices from cable or other network operators.

FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF SECRETARY

TO: REED HUNDT, CHAIRMAN  
THE FEDERAL COMMUNICATIONS COMMISSION

Re: Compatibility Between Cable Systems and Consumer Electronics Equipment  
ET Dkt. No. 93-7 (Implementation of Section 17 of the 1992 Cable Act)

As owners and users of TVs and VCRs, we join the **Consumer Federation of America** and the **Home Recording Rights Coalition** in supporting measures to eliminate the cable monopoly over set-top boxes and to foster an open market for cable-related consumer devices. We applaud the Commission for its efforts to date in promoting compatibility between cable services and consumer-owned equipment. We respectfully urge the Commission to continue its pro-consumer efforts and enact the following measures in its next round of rulemaking:

- ◆ **Prohibit scrambling on all regulated tiers of cable service that were not scrambled before the enactment of the 1992 Cable Act**, so cable companies cannot impose new set-top devices or other equipment on subscribers whose service is unchanged.
- ◆ **Separate signal access control functions from other functions provided by set-top boxes**, so that except for descrambling modules, we can purchase fully capable set-top boxes, TVs and VCRs at retail.
- ◆ **Establish standards for digital cable transmission**, including a national renewable security standard, so in the future we can buy compatible TVs, VCRs and other equipment without having to rent any access devices from cable or other network operators.
